Play temple swing events, collect relics and earn rewards. Unlock brand new heroes: Gold Flash Tom! After playing Gold Rush, this was another great game to try. I have some complaints. For example, it takes 3 hours to open the chest, which is the only source of jewelry. You will have to wait forever until you can finally upgrade what it will take the jewels. Also, many times it glitches and I reload and lose thousands of coins. Well, you might think I'm going to complain about ads. But no. The reason is that I found the trick. This game still works without internet. But as you may know, you can't show ads without the internet. If you turn off the internet, you can enjoy this game without free ads. So yes. Have fun in the game. I saw an ad that was shooting and screaming in this game. I wasn't lost, but I know a 4-year-old kid who plays this game. I don't think it's okay to show small children ads like that. Developers should be considerate. This is like the original Talking Tom Gold Run (which I like too, by the way). I was really good at other games but then I was a bit bored so I asked my dad if I could buy Talking Tom Hero Dash and it's more interesting than any other gaming app I have on my dad's phone. This game is great and you don't have to pay in real life to download this app. And there are these award-winning ones that you can get to unlock more useful objects that you can use first while running. And there are a bunch of bandits that get in your way, but you can kick them out as you go. And to make things better, you have this place and if you take out all the bad ones and there is no dirt more than when the bandits covered it with disgusting oil and tape, you can unlock the next character. I really think Outfit7 is doing a good job and I think they need to keep it up. Good job! I have to play duty mobile calls because after all levels, after all levels you don't have anything interrupted by ads, developers don't give customers the opportunity to play games without worrying about ads, but every app you make always has more ads, so I have to play duty mobile calls and it's a free app that I don't suffer from ads. It should be such a kid-friendly game, so in my opinion, the app the kid is going to play shouldn't be interrupted by advertising and for this reason it's just a great game I'm giving to a one-star witch, You shouldn't blame customers for a bunch of ads that don't get so many customers the way I want to play this game, or at least update to reduce them I don't have to do with app purchases to get rid of ads and this is not impressed with all the ads I played this game on my first day, but the game is all good and The future of the game could be brighter if developers cut back on advertising, and developer Outfit7 Limited has indicated that the app's privacy practices may include the handling of the data described below. For more information, see the developer's privacy policy. The following data can be used to track you between apps and websites owned by other companies: Place of Purchase User Content Identifier Usage Data Diagnostics The following data may be collected and linked to your ID.
